EDUCATION

Bachelor of Engineering — Information Technology *Expected June 2026*
PES Modern College of Engineering — Savitribai Phule Pune University CGPA: **8.01/10**
Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering, System Design

TECHNICAL SKILLS

Languages	Java, JavaScript, SQL, HTML, CSS
Frontend	React.js, Tailwind CSS, Chart.js, Axios, Responsive Design
Backend	Spring Boot, Spring Security, Spring Data JPA, Hibernate ORM, REST APIs, JWT Authentication, Node.js, Express.js
Databases	PostgreSQL, MySQL, Redis
Cloud & Tools	AWS (Cloud Architecting), Git, GitHub, Docker, Postman, Maven, Render, Vercel, Neon PostgreSQL
CS Fundamentals	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design, Scalability

PROJECTS

FinNova AI — AI-Powered Personal Finance SaaS Platform [GitHub] [Live] *Apr 2026 – Jun 2026*
Spring Boot, Java, PostgreSQL, Spring Security, JWT Authentication, REST APIs, Gemini AI, React.js, Tailwind CSS, Chart.js, Vercel, Render

- Engineered a production-deployed full-stack AI finance platform for expense tracking, budget management, and savings goals, reducing manual tracking effort by 70%.
- Secured 15+ REST API endpoints with JWT Authentication via Spring Security and BCrypt encryption, enforcing role-based access and user-specific data isolation.
- Architected 15+ RESTful APIs with Controller-Service-Repository pattern, cutting average API response time by 40% through optimized JPA queries.
- Integrated Google Gemini AI to deliver personalized budget recommendations and financial health insights to 100% of registered users on demand.
- Deployed React frontend on Vercel and Spring Boot backend on Render with CORS and secrets configuration, achieving 99% uptime in production.

URL Shortener Service — Production-Grade Scalable System [GitHub] [Live] *Mar 2026 – Apr 2026*
Spring Boot, Java, PostgreSQL, Redis, REST APIs, Maven, React.js, Render, Vercel

- Delivered a production-grade URL shortening service with Base62 encoding, handling 1,000+ URLs across a live deployment with scalable redirection workflows.
- Reduced database lookups by 80% via Redis cache-aside pattern, cutting average redirection latency from 120ms to under 25ms on read-heavy traffic.
- Designed 8+ REST API endpoints for URL creation, redirection, and analytics tracking with DTO-based validation and clean separation of concerns across all backend layers.
- Improved query performance by 60% through indexed short-code lookups and schema optimization, sustaining high-throughput workloads with sub-30ms average DB response time.

AlgoVision — Interactive DSA Visualizer [GitHub] *Oct 2025 – Dec 2025*
React.js, Node.js, Express.js, JavaScript, HTML, CSS

- Implemented real-time visualizations for 6 algorithms (BFS, DFS, Dijkstra's, Bubble Sort, Merge Sort, Quick Sort) with step-by-step animations and user-controlled playback.
- Boosted render performance by 35% via React memoization and reusable components, supporting smooth animation across 100+ node graphs.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **200+ DSA problems** across LeetCode, GeeksforGeeks, HackerRank, and InterviewBit — arrays, trees, graphs, and dynamic programming.
- **AWS Academy Graduate** — Cloud Architecting Certification; 40+ hours of hands-on training in AWS core services and scalable cloud infrastructure.
- **Top 5 Finalist — Smart India Hackathon 2024** (College Round); delivered a working prototype in a 36-hour engineering sprint against 20+ teams.
